Susan:

I talked directly with the contractor for the trustee, Greg Bloomfield, with IKON Environmental. He indicated that they have an agreement to take care of the 2 vac boxes and the waste piles. This action is anticipated to be completed by the end of the first week in August. He indicated that they have no agreement to handle the entire site and that they do not have the ability to forward fund the cleanup with reimbursement at sale of the property. It would appear to me that we will likely be involved in the site in August. We need to discuss this with TCEQ to see if they have any further developments or plans. We should begin our discussions with the Trustee after conferring with TCEQ.

Thanks
